Definitions

Governance

Refers to the systems in place to support effective management and operation of the service, consistent with the service's statement of philosophy. Good governance requires effective management systems and clearly delineated roles and responsibilities to support the effective operation of a quality service. The need for governance exists anytime a group of people come together to accomplish an end. Though the governance literature proposes several definitions, most rest on three dimensions: authority; decision-making, and accountability. A working definition of governance reflects these dimensions: Governance determines who has power, who makes decisions, how other players make their voice heard and how account is rendered. Ultimately, the application of good governance serves to realise organisational and societal goals.

Approved Provider

A person or Organisations delegate who holds a provider approval under the Education and Care Services National Regulations 2011 and the Education and Care Service National Law Act 2010. A

provider approval authorises a person to apply for one or more service approvals and is valid in all jurisdictions.

Nominated Supervisor

A person with responsibility for the day to day management of an approved service.

Educational Leader (Pedagogical Leader)

The educational leader is an appropriately qualified and experienced educator, coordinator or other individual designated in writing by the approved provider under regulation 118 (Education and Care Services National Regulations 2011) to lead the development and implementation of educational programs in the service.
